01 About Hotel Broker SaaS — How It Works

The Brokerage Concept

Hotel Broker SaaS is designed for travel agents and brokers who do **not** own hotel rooms but buy allotments from hotels (Suppliers) and resell them to their clients (travel companies, agents). Every booking you create tracks the buy price, sell price, profit, and automatically updates both your supplier and client ledgers.

Supplier	The hotel you buy rooms from. You owe them the Buy Total.
Client	The travel agent or company you sell rooms to. They owe you the Sell Total.
Booking	One room reservation — guest name, hotel, dates, rooms, buy/sell rates.
Profit	Sell Total – Buy Total. Calculated and shown live as you enter rates.
Voucher	A printable PDF confirmation generated automatically for every booking.
Ledger	Auto-updated accounts: what clients owe you (receivable) and what you owe suppliers (payable).
Statement	A full transaction history for any supplier or client — all bookings + payments with running balance.

What Happens When You Create a Booking

Action	What Happens Automatically
Create a booking	• Booking number assigned • Supplier ledger CREDITED (you owe them the buy total) • Client ledger DEBITED (they owe you the sell total) • Voucher PDF available instantly • Dashboard totals update
Record a payment to supplier	• Supplier ledger DEBITED • Payable balance decreases
Record a receipt from client	• Client ledger CREDITED • Receivable balance decreases
Delete a booking	• Both ledger entries reversed • Dashboard totals recalculate

02

Logging In

Fig 2.1 — Hotel Broker SaaS login page

How to Log In

Open the Hotel Broker SaaS URL provided by GenZ Softwares. Enter your company email and password, then click **Sign In**.

Email	The email address registered for your company account.
Password	Your account password as set during registration or provided by GenZ Softwares.
Forgot?	Contact GenZ Softwares to reset your password: 0324-4870261.

NOTE: Each company has its own isolated account. Your bookings, clients, suppliers, and ledgers are completely private and not visible to any other company on the platform.

03 Dashboard

Fig 3.1 — Dashboard showing booking activity and financial summary

Dashboard Overview

The dashboard gives you an instant snapshot of your business. All figures update automatically as you add bookings and record payments.

Total Bookings	Total number of bookings created. Shows count 'this month' underneath.
Total Revenue	Sum of all Sell Totals — what clients have been billed. Shows this month's figure too.
Total Profit	Revenue minus Buy Totals — your net earnings across all bookings.
Suppliers / Clients	Count of active supplier and client accounts.
Payable to Suppliers	Outstanding amount you still owe to all suppliers (orange — money going out).
Receivable from Clients	Outstanding amount clients still owe you (green — money coming in).
Recent Bookings	Last few bookings with Booking #, Guest, Hotel, Client, Sell Total, Profit, and Status. Click 'View all' to go to the full Bookings page.

TIP: Keep an eye on Payable vs Receivable — ideally Receivable should always be higher than Payable so your cash flow stays positive.

04 Suppliers & Clients

Suppliers — The Hotels You Buy From

Suppliers are the hotels or room providers you purchase allocations from. Add every hotel you work with as a supplier before creating bookings.

Add Supplier	Go to Suppliers → click Add. Enter name, phone, email, address, and optional opening balance.
Opening Balance	If the supplier already has an existing balance (you already owe them money from before), enter it here so ledger history is accurate.
View Statement	Click 'View Statement' on any supplier to see their full ledger history — every booking charge and payment.
Edit / Delete	Use the edit or delete actions on each supplier row.

Clients — The Agents You Sell To

Clients are the travel agents or companies you sell hotel rooms to. Each booking is linked to one client whose ledger gets charged automatically.

Add Client	Go to Clients → click Add. Enter name, phone, email, address, and optional opening balance.
Opening Balance	If the client already owes you money from before the system, enter it here.
View Statement	See every booking and payment for that client with a running balance.

TIP: Always add your suppliers and clients first before creating any bookings — their names appear in the booking form dropdowns.

05 Bookings

Bookings

14001	ashraf	gulnar	11/08/2026 → 20/08/2026	ZAID	SAR 1170.00	SAR 90.00	CONFIRMED
BK-0004	ABM	gulnar	05/08/2026 → 19/08/2026	ZAID	SAR 2100.00	SAR 420.00	CONFIRMED

Fig 5.1 — Bookings list with search and status filter

Viewing & Searching Bookings

The Bookings page lists every reservation. Search by guest name, hotel, or booking number. Filter by status using the dropdown.

Booking #	Auto-generated number (e.g. 14006, BK-0004). Click it to open booking details.
Guest	The guest or group name for the hotel stay.
Hotel	The hotel name where rooms are booked.
Check In/Out	Dates of the stay.
Client	The client being billed for this booking.
Sell Total	Total amount charged to the client (Sell Rate × Nights × Rooms).
Profit	Sell Total – Buy Total (shown in green if positive, red if negative).
Status	CONFIRMED / PENDING / COMPLETED / CANCELLED.
Document icon	Opens the booking detail and voucher page.
Trash icon	Deletes the booking and reverses all ledger entries.

Creating a New Booking

Click **+ New Booking** from the Dashboard or Bookings page. Fill in the form sections:

Section 1: Guest & Hotel

Guest Name	Name of the guest or travel group staying at the hotel.
Hotel Name	Name of the hotel providing the rooms.
Hotel Booking No.	The confirmation number given to you by the hotel/supplier (e.g. HV-5243). Optional but recommended.
Room Type	Type of room being booked (e.g. Quad, Double, Suite).
Check In / Check Out	Stay dates. Nights are calculated automatically.
Nights	Auto-calculated from dates. You can manually adjust if needed.
Rooms	Number of rooms in this booking.

Section 2: Supplier & Client

Supplier	Select the hotel you are buying from. Their payable ledger will be credited with the Buy Total.
Client	Select who you are selling to. Their receivable ledger will be debited with the Sell Total.

Section 3: Pricing

Buy Rate / Night	What you pay the supplier per room per night (in your account currency).
Sell Rate / Night	What you charge the client per room per night.
Advance Payment Received	If the client has already paid a deposit, enter it here. Reduces the Balance Due shown.
Buy Total	Auto-calculated: Buy Rate × Nights × Rooms.
Sell Total	Auto-calculated: Sell Rate × Nights × Rooms.
Profit	Auto-calculated: Sell Total – Buy Total. Green = profit, Red = loss.
Balance Due	Sell Total – Advance Payment. What the client still owes for this booking.

Section 4: Status & Notes

Status	CONFIRMED (default), PENDING (awaiting confirmation), CANCELLED.
Notes	Internal notes — not printed on the voucher.

TIP: The Profit and Balance Due panels update **live** as you type rates and dates — review them before clicking 'Create Booking & Generate Ledger'.

NOTE: Once you click 'Create Booking & Generate Ledger', the system instantly creates two ledger entries and makes the voucher PDF available. No extra steps needed.

06 Ledger

Fig 6.1 — Ledger page with Supplier and Client tabs

Understanding the Ledger

The Ledger page shows who owes what. It has two tabs — Supplier Ledger and Client Ledger.

Supplier Ledger	Lists all suppliers with a 'View Statement' button. Click it to see every booking charge and payment to that supplier, with a running balance showing how much you still owe them.
Client Ledger	Lists all clients with a 'View Statement' button. Click it to see every booking charge and payment from that client, with a running balance showing how much they still owe you.

Reading a Statement

Column	Meaning
Date	Date of the transaction (booking date or payment date).
Description	What the entry is for — booking reference or payment note.
Debit	Money charged / going out. For clients: booking charges. For suppliers: payments you made.

Credit	Money credited / coming in. For clients: payments received. For suppliers: booking costs added.
Balance	Running total. For clients: positive = they owe you. For suppliers: positive = you owe them.

TIP: Print or share the Statement as a PDF directly from the Statement page — it's a professional document you can send to your supplier or client.

07 Payments

Recording Payments

Go to **Payments** → **+ New Payment** to record any money movement. Payments automatically update the relevant ledger.

Party Type	SUPPLIER (you are paying them) or CLIENT (they are paying you).
Party	Select which supplier or client this payment is for.
Amount	The payment amount in your account currency.
Method	Payment method (cash, bank transfer, cheque, etc.) — optional.
Reference	Bank reference number or cheque number — optional but useful for records.
Date	Date the payment was made or received.
Notes	Any additional note about this payment.

Payment Type	Effect on Ledger	Effect on Dashboard
Supplier Payment (you pay them)	Supplier ledger DEBITED — reduces what you owe	Payable to Suppliers decreases
Client Receipt (they pay you)	Client ledger CREDITED — reduces what they owe	Receivable from Clients decreases

Save Settings

Fig 8.1 — Company Settings page

Configuring Your Company Profile

Go to **Settings** to update your company information. This information appears on all vouchers and invoices generated by the system.

Company Name	Your brokerage or travel company name — appears on all vouchers.
Email	Your company contact email — appears on vouchers.
Phone	Your company phone number — appears on vouchers.
Address	Your company address — optional, appears on vouchers if filled.
Currency	Your base currency (e.g. SAR — Saudi Riyal, PKR — Pakistani Rupee). All booking amounts are displayed in this currency.
Save Settings	Click to apply all changes. Updates will reflect on all future vouchers immediately.

NOTE: The currency you set here determines how amounts are displayed throughout the system. Set it correctly before creating any bookings.

09 Super Admin Panel

The screenshot displays the Super Admin Panel interface. On the left is a dark sidebar with the GenZ Softwares logo and a menu for MAIN (Dashboard, Bookings, Suppliers, Clients, Ledger, Payments, Settings) and ADMIN (Super Admin). The main content area is titled 'Super Admin' with the subtitle 'Manage all customer companies on this platform'. A '+ Add New Company' button is in the top right. Three summary cards show 'TOTAL COMPANIES: 3', 'ACTIVE: 2', and 'TOTAL BOOKINGS: 12'. Below these is a table of company accounts.

COMPANY	CONTACT	CURRENCY	USERS	BOOKINGS	STATUS	ACTIONS
S Shifa shifa@genzsoftware.com		PKR	1	0	Active	
A Ahmad Trvl ahmad@gmail.com	+9665439871	SAR	1	2	Disabled	
G GenZ Softwares zaid@genzsoftwares.com	03244870261	SAR	1	10	Active	

At the bottom left of the sidebar, the user 'Zaid' (zaid@genzsoftwares.com) is logged in, with a 'Sign out' link.

Fig 9.1 — Super Admin panel showing all company accounts

What is the Super Admin Panel?

The Super Admin panel is a platform-level control panel visible only to GenZ Softwares and the platform administrator. It is used to manage all company accounts on the platform — your clients as a software provider, not your hotel clients.

Total Companies	Number of companies registered on the platform.
Active	Companies currently active and able to log in.
Total Bookings	Cumulative bookings across all companies on the platform.
Company list	Each row shows the company name, contact, currency, number of users, bookings count, and status.
Status: Active	Company can log in and use the system normally.
Status: Disabled	Company access is blocked — used when a subscription expires or payment is pending.
+ Add New Company	Register a new customer company on the platform. Their login credentials are set here.
Delete	Permanently removes a company and all their data.

NOTE: As a client of Hotel Broker SaaS, you will not need to use the Super Admin panel. It is managed by GenZ Softwares. Contact us at 0324-4870261 to add users, change your plan, or update your account status.

10 Quick Reference

Booking Workflow — Step by Step

Step 1: Add your Suppliers (hotels) under the Suppliers menu.

Step 2: Add your Clients (travel agents) under the Clients menu.

Step 3: Go to Bookings → + New Booking.

Step 4: Fill in Guest, Hotel, Dates, Supplier, Client, Buy Rate, Sell Rate.

Step 5: Check the live Profit panel — confirm your margin is correct.

Step 6: Click 'Create Booking & Generate Ledger'. Done.

Step 7: Download the voucher PDF from the booking detail page.

Step 8: When you receive payment from the client → record it in Payments.

Step 9: When you pay the supplier → record it in Payments.

Step 10: Check Ledger → Statements anytime to see outstanding balances.

Status Meanings

Status	Meaning
CONFIRMED	Booking is active and confirmed with the supplier.
PENDING	Booking created but awaiting supplier confirmation.
COMPLETED	Guest has checked out. Stay is over.
CANCELLED	Booking was cancelled. Ledger entries are reversed.
