01 About TravelPro — How It Works

System Overview

TravelPro is a complete travel agency management system built for your agency. Each agency gets its own private account — your data is fully isolated from other agencies. The owner registers the agency, invites team members with specific roles, then manages customers, suppliers, bookings, payments, and financial reports — all in one place.

Agency	Your travel company — has its own login, data, and settings.
Owner	The person who registered — has full control of everything.
Team	Staff you invite (Manager, Agent, Accountant) — each has restricted access based on role.
Customers	The people/companies your agency sells tickets, visas, and hotels to.
Suppliers	Airlines, visa offices, hotels — the vendors you buy services from.
Bookings	Every sale — Ticket, Visa, or Hotel — with automatic profit calculation and voucher.
Ledgers	Auto-generated accounts: what customers owe you, what you owe suppliers.

What Happens When You Create a Booking

Every booking you save triggers a full automatic chain — no manual entry needed anywhere:

Action	What Happens Automatically
Save a booking	• Unique reference number assigned (TKT-000001, VIS-000001, HTL-000001) • Profit calculated: Sale Price – Cost Price • Customer ledger DEBITED (they owe you the sale amount) • Supplier ledger CREDITED (you owe them the cost amount) • Voucher PDF available instantly
Record a payment (Receipt)	• Customer ledger CREDITED (reduces what they owe) • Receivable balance decreases
Record a payment (Payment)	• Supplier ledger DEBITED (reduces what you owe) • Payable balance decreases
Cancel a booking	• Ledger entries reversed • Booking marked CANCELLED

02 Login & Registration

Fig 2.1 — TravelPro login page

Logging In

Open the TravelPro URL provided by GenZ Softwares. Enter your email and password, then click **Sign In**.

Email	The email address used when the agency was registered.
Password	Your account password (set during registration or provided by your Owner).
New agency?	Click 'Create an account' to register a new travel agency. You become the OWNER and can invite your team afterwards.

NOTE: Each team member gets their own login email and password — you do not share credentials. The Owner adds teammates from the Team page.

03

Dashboard

Fig 3.1 — Dashboard showing financial summary and charts

Understanding the Dashboard

The dashboard gives you a real-time financial snapshot of your entire agency. All figures update automatically as bookings and payments are recorded.

Total Sales	Sum of all sale prices across all bookings.
Total Cost	Sum of all purchase costs across all bookings.
Profit	Total Sales minus Total Cost — your net earnings (shown in green).
Bookings	Total number of bookings recorded.
Receivable (owed to us)	Total outstanding amount customers haven't paid yet (shown in orange).
Payable (we owe)	Total outstanding amount you owe suppliers (shown in red).

Charts

Profit by service type	Table showing Sales, Cost, Profit, and Count broken down by TICKET, VISA, HOTEL.
Monthly performance	Month-by-month table of Sales, Cost, Profit, and Bookings count.

NOTE: The Dashboard is only visible to OWNER, MANAGER, and ACCOUNTANT roles. AGENT users are redirected to the Bookings page instead.

04 Customers & Suppliers

Customers

Customers are the people or companies you sell travel services to. Every booking must be linked to a customer — this is who appears on the voucher and whose ledger gets charged.

Add Customer	Go to Customers → click Add. Fill in name, phone, email.
Edit / Delete	Use the Edit or Delete buttons on each customer row.
Customer Ledger	Every booking and payment for a customer is tracked automatically in the Ledger.

Suppliers

Suppliers are the vendors you buy services from — airlines, visa offices, hotels. When creating a booking, you link it to a supplier so their payable ledger updates automatically.

Add Supplier	Go to Suppliers → click Add. Fill in name, phone, email.
Supplier Ledger	Every booking cost and supplier payment is tracked automatically.

TIP: Add all your regular customers and suppliers before creating bookings — their names appear in the booking form dropdowns.

Viewing Bookings

The Bookings page lists every sale with its reference number, type, customer, details, date, status, sale price, and profit. Filter by service type using the dropdown at the top.

Reference	Auto-generated: TKT-000001 (ticket), VIS-000001 (visa), HTL-000001 (hotel).
Type badge	RED badge shows the service type: TICKET, VISA, or HOTEL.
Details	Quick summary — airline/sector/passenger for tickets, hotel name for hotels.
View	Opens the full booking detail modal.
Edit	Modify the booking — ledger entries are recalculated automatically.
PDF	Download the voucher PDF for that booking.
Cancel	Cancels the booking and reverses ledger entries.

Creating a New Booking

Click **+ New Booking**. The form changes dynamically based on the service type you select.

Common Fields (all types)

Service type	Choose: Ticket, Visa, or Hotel. The form updates instantly.
Customer	Who you are selling to — their ledger gets debited.
Supplier	Who you are buying from (optional) — their ledger gets credited.
Cost	What you pay the supplier for this service.
Sale	What you charge the customer.
Profit	Auto-calculated live: Sale – Cost (shown in green panel).
Exchange rate	If the booking is in a foreign currency, enter the rate to PKR. Default is 1.
Booking date	Date of the transaction. Defaults to today.

Ticket-Specific Fields

PAX Name	Passenger name as on the ticket.
Ticket No	The airline ticket number.
Sector	Route, e.g. ISB-RUH or LHE-DXB.
EXO#	Exchange order number (if applicable).
Airline	Name of the airline.
C/O (Care Of)	Auto-filled from the selected Customer.
Issue From	Auto-filled from the selected Supplier.

Visa-Specific Fields

Applicant Name	Name of the visa applicant.
Passport No	Applicant's passport number.
Country	Country the visa is for.
Visa Type	Tourist, Business, Umrah, etc.

Hotel-Specific Fields

Hotel Name	Name of the hotel.
City	City where the hotel is located.
Check-in / Check-out	Guest stay dates.
Nights	Auto-calculated from check-in and check-out dates.
Guest Name	The person staying at the hotel.

TIP: The profit panel updates live as you type Cost and Sale amounts. Review it before saving to make sure your margin is correct.

06 Payments

Recording Payments

Payments are how you record money moving in and out. Go to **Payments** → **+ New Payment**.

RECEIPT	Money received FROM a customer. Reduces their receivable balance in the ledger.
PAYMENT	Money paid TO a supplier. Reduces your payable balance in their ledger.
Amount	The payment amount.
Currency	Currency of the payment. Enter exchange rate if different from your base currency.
Date	Date the payment was made or received.
Notes	Optional reference or description.

NOTE: Payments are only accessible to OWNER, MANAGER, and ACCOUNTANT roles. AGENT users cannot see or record payments.

07 Ledgers & Balances

Ledgers & Balances				Log out
Customer receivables Supplier payables				
CUSTOMER	TOTAL DEBIT	TOTAL CREDIT	OWES US	
BLUE ONYXX	130,200.00	0.00	130,200.00	Statement

PAK HIJAZ
Jawad · OWNER

Fig 7.1 — Ledgers page showing customer receivables

Understanding Ledgers

The Ledgers page shows exactly who owes what. There are two tabs:

Customer Receivables	What customers owe your agency. Total Debit = all charges from bookings. Total Credit = all payments received. Owes Us = Debit – Credit (shown in red if outstanding).
Supplier Payables	What your agency owes suppliers. Total Credit = all purchase costs from bookings. Total Debit = all payments made to supplier. We Owe = Credit – Debit.
Statement button	Opens a full transaction history for that customer or supplier — every booking charge and payment listed with a running balance.

TIP: Use the Statement to answer a customer who disputes their balance — it shows every charge and payment in chronological order with a running total.

08 Reports & Analytics

Fig 8.1 — Reports page with date filter and monthly chart

Using the Reports Page

Reports give you a full financial picture of your agency over any date range.

Date range filter	Set From and To dates, then click Apply to filter all charts and totals.
Total Sales / Cost / Profit	Summary cards for the selected period.
Bookings count	Number of bookings in the period.
Monthly Sales, Cost & Profit chart	Bar chart showing each month's Sales (blue), Cost (gray), and Profit (green) side by side.
Export Ticket Register	Downloads an Excel file of all ticket bookings — formatted exactly like your manual Excel register (PAX Name, Ticket No, Sector, C/O, Issue From, EXO#, Purchase, Sale, Profit).
Export All Bookings	Downloads an Excel file of all bookings across all service types.

TIP: Use 'Export Ticket Register' at the end of each month to get your standard ticket register Excel file — same format as your old manual spreadsheet.

09 Team Management

Fig 9.1 — Team page showing members and role permissions

Managing Your Team

The Team page lets the Owner and Manager invite and manage staff. Each team member gets their own email/password login with restricted access based on their role.

+ Add Teammate	Enter the new team member's name, email, and assign a role. They receive login credentials to access the system.
Change role	Use the role dropdown on each row to promote or demote a team member.
Deactivate	Toggle a team member's status to block their access without deleting them.

Role Permissions

Role	What They Can Access
OWNER	Full control — all modules including Team and billing. Cannot be removed.
MANAGER	Bookings, Customers, Suppliers, Payments, Ledgers, Reports, Team.
AGENT	Bookings and Customers only. Cannot see Payments, Ledgers, or Reports.
ACCOUNTANT	Ledgers, Payments, and Reports only. Cannot create bookings.

WARNING: You cannot remove the last OWNER from the agency, and you cannot deactivate your own account.

10 Quick Reference

Booking Reference Formats

Ticket	TKT-000001, TKT-000002, ...
Visa	VIS-000001, VIS-000002, ...
Hotel	HTL-000001, HTL-000002, ...

Who Can Do What
